<p>You have been asked to participate in a research study to help us understand how homeowners are reducing the risk of damage to their homes during hurricanes or earthquakes. We will use the findings of this study to develop new programs to encourage homeowners to reduce these risks to their home before the next hurricane or earthquake.</p> <p>What will you be asked to do?</p> <p>If you agree to participate in this study, you will be asked to answer a series of questions for a survey administrator. This survey will take approximately 20 minutes and will be administered to 500 households in your community.</p> <p>What are the risks involved in this study?</p> <p>The risks involved with participation in this study are low and may include some sadness in recalling damage sustained to your residence in past disasters.</p> <p>What are the possible benefits of this study?</p> <p>You will receive no direct benefit from participating in this study; however, what we learn from this survey may help us encourage greater risk reducing actions among homeowners threatened by hurricanes and earthquakes.</p> <p>Do you have to participate?</p> <p>No, your participation is voluntary. You may decide not to participate at all or, if you start the study, you may withdraw at any time. Withdrawal or refusing to participate will not</p>	<p>Nou mande ou pouw patisipe nan ankèt saa k'ap ede nou konprann kòman mèt kay yo ap redwi risk ak domaj nan kay yo nan moman siklòn ak tranbleman tè.
